NEW FROM THE PUREWAVES

EMS GLOVES

EMS BODY PADS

What PUREWAVE Offers

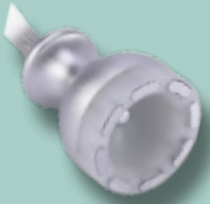

Cavitation Body

Uses ultrasound waves to target and break down stubborn fat deposits.

Radio Frequency Body

Delivers controlled heat to tighten skin and stimulate collagen production.

Suction with RF

Combines radio frequency and suction to reduce cellulite and improve skin texture.

Radio Frequency Face

Applies radio frequency to firm and rejuvenate facial skin, reducing fine lines

EMS Face Probe, Gloves & Body pads

Utilises electrical muscle stimulation to tone muscles and enhance circulation.

Reviews from past students & clients

Client Review

"The treatment was so calming, and I left feeling tighter, lifted, and more confident. I've rebooked the full course!"

— *Natalie T*

Student Review

The training was thorough and easy to follow, even with no tech experience. I was blown away by how professional the machine is. Within the two month, I made back my investment and more."

— *Samantha M., salon owner*

Student Review

"What I love most is the versatility. I started with just the face attachments, and later added the body ones. Now I offer full sculpting packages, and my bookings are fully booked weeks in advance"

— *Glow Hub Beauty*

Client Review

"I loved that the treatment worked my muscles at the same time as tightening my skin. After just a few sessions, my jeans fit better and my skin feels smoother."

— *Kiera L.*

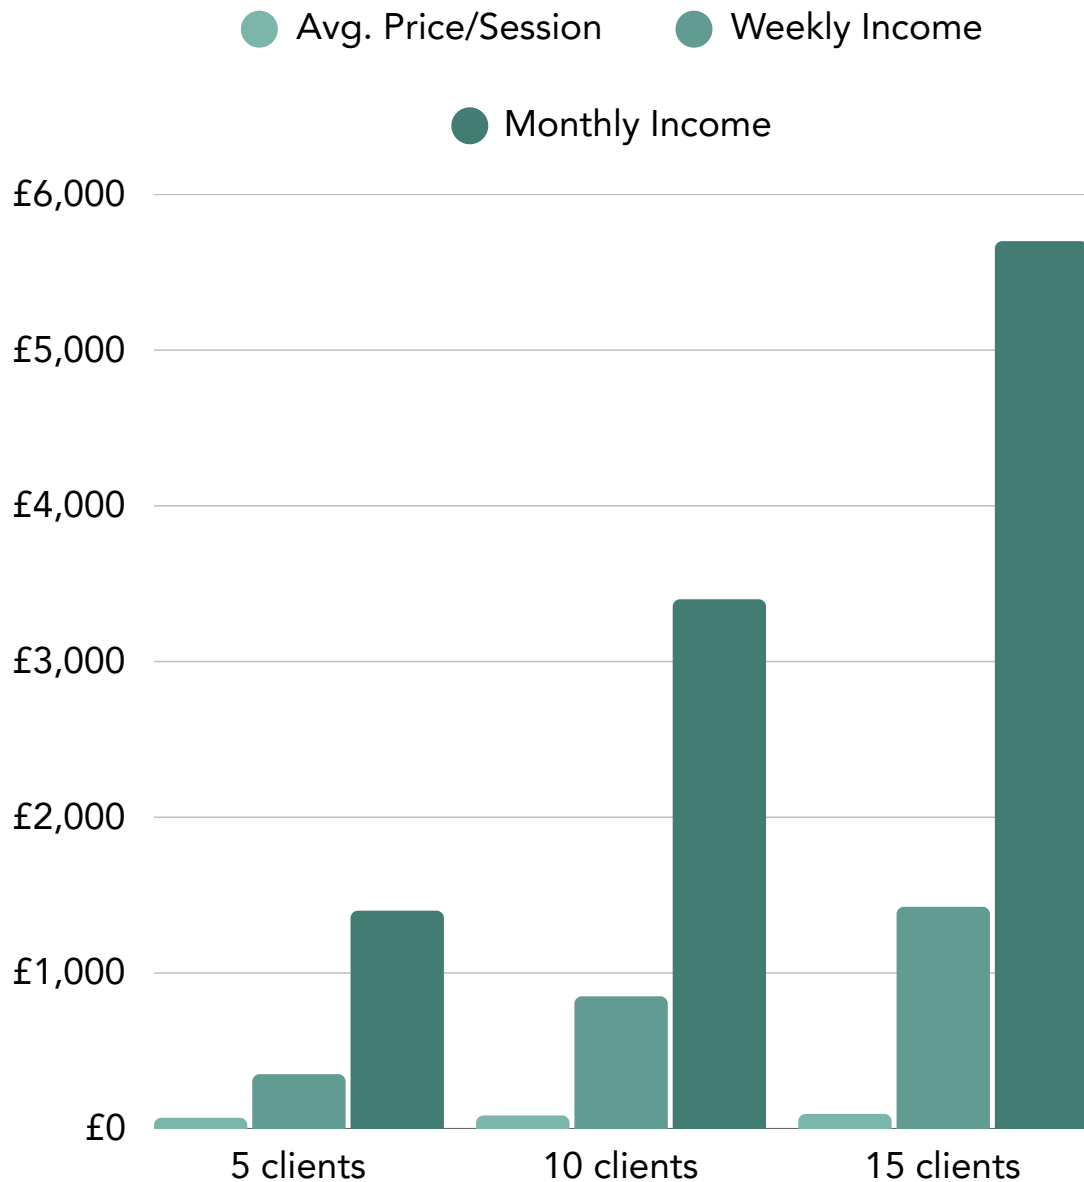

OUR RESULTS

One treatment

How The PUREWAVE Can Work For You

With just 5 clients per week, most owners see a return on investment in under 3 months. Clients typically return for at least 3/6 sessions—many choose to book weekly block sessions to maximise their results.

After completing a course, they often move to monthly maintenance treatments, especially in the lead-up to summer when demand naturally increases.

With the average PUREWAVE session priced at £70–£80, it's a powerful addition to any salon looking to create new, consistent streams of profit.

Welcome to the Beauty of biohacking

We've seamlessly blended holistic wellness with results-driven technology.

Biohacking uses advanced technology and targeted treatments to naturally enhance the body's performance, appearance, and overall well-being.

Once you've mastered how to operate the machine and tailor treatments to different body types, the rest is effortless — the technology does the hard work for you.

Non-Invasive Face & Body Treatments — No Needles, No Downtime
Whether it's post-pregnancy, weight loss, or early signs of aging, your skin sometimes needs extra support. Our advanced treatments help restore firmness, tone, and natural glow — safely and effectively.

Body Confidence

After major changes like pregnancy or weight loss, your skin may struggle to bounce back on its own. Our body treatments use cutting-edge technology to stimulate collagen and elastin production, helping to:

- ✨ Tighten loose skin
- ✨ Firm and tone key areas
- ✨ Support recovery from diastasis recti with targeted Body Pads

These treatments are gentle, effective, and tailored to each client's needs — making it easier to reclaim your confidence without invasive procedures.

Facial Treatments

From the age of 25, collagen production naturally begins to slow — leading to early signs of sagging and loss of elasticity. Our Fresh Face Facial is a deeply relaxing yet powerful treatment that uses advanced technology to:

- ✨ Stimulate natural collagen and elastin production
- ✨ Prevent and treat early signs of sagging
- ✨ Lift, firm, and refresh your skin from within

Perfect for those wanting visible results without injections or downtime.

Backed by Science. Designed for Confidence.

We've blended holistic wellness with results-driven technology to create truly transformative treatments. Once the device is mastered and treatments are tailored to different body types, the process becomes effortless — the technology does the hard work, delivering consistent, high-impact results.

Welcome to the future of self-care. Welcome to the world of biohacking.

Why should you offer our signature facial

RF + EMS = Sculpted, Tight,
Glowing Skin

Lift muscles.
Boost collagen.
No needles, no downtime.

- ✦✦ Snatched jawline
